PATCHARAPON YORIYA

TEST ENGINEER

89/3 PruksaVille SanKlang DoiSaket ChiangMai 50130
Phone : +66-80-979-2185
Email : patcharaponyo65@gmail.com | bestport

SUMMARY

Test Engineer specializing in software testing and quality assurance. Experienced in manual testing, end-to-end testing, test case design, execution, and defect reporting. Strong understanding of SDLC and Agile practices, with hands-on experience in API validation and dashboard data verification. Technical background in web technologies with strong analytical thinking and problem-solving skills. Passionate about delivering reliable and high-quality software.

EDUCATION

Rajamangala University of Technology Lanna, Thailand
Bachelor's Computer Engineer (2022-2026) | GPA: 3.4

EXPERIENCES

Banana Coding Co.,Ltd.

Banana AI work assistant - R&D

Web-based AI assistant system integrated with MCP and external LLMs

- Worked as a Test Engineer Intern at Banana Coding
- Designed and executed test cases for MCP tools and web assistant features
- Performed manual testing, contract testing, and API validation (Postman / JSON Schema)
- Validated system workflows (Azure DevOps, Banana Office, Pastel – read-only integration)
- Conducted regression testing and continuous validation to ensure system stability before release
- **Duration:** 17 November 2025 – 6 March 2026 (4 months)

CCT MIS Development

Web-based Church Management Information System

- Worked as a Test Engineer Intern at Banana Coding
- Performed end-to-end testing across multiple modules
- Executed functional and regression testing, and reported defects
- Tracked test cases and progress via Trello
- **Duration:** 7 January 2026 – 28 January 2026 (3 weeks)

SmartCheck

Web-based Analytics Dashboard System

- Worked as a Test Engineer Intern at Banana Coding.
- Performed end-to-end testing for analytics dashboard tiles (Fleet Comparison, Connectivity, Defect Summary, Vehicle Utilisation)
- Validated data accuracy, calculations, and percentage metrics against business requirements
- Conducted API testing using Bruno, including request/response validation
- Executed functional and regression testing for charts and reporting features
- **Duration:** 17 November 2025 – 6 March 2026 (4 months)

EXPERIENCES (CONTINUED)

- **Banana Coding Co.,Ltd.**

- **ShowroomStock**

  Multi-location showroom stock management app

  - Worked as a Test Engineer Intern at Banana Coding
  - Performed QA testing covering synchronization between ERP and transport planning data
  - Executed functional and integration test scenarios for showroom stock workflows
  - **Duration:** December 2025 (2 weeks)

- **GasVan Sale**

  Gas cylinder sales and delivery management system

  - Worked as a Test Engineer Intern at Banana Coding
  - Conducted functional and regression testing for van sales and delivery workflows
  - Validated invoicing and customer registration processes
  - **Duration:** February 2026 (3 weeks)

- **Traili**

  French waste-sorting rewards app

  - Worked as a Test Engineer Intern at Banana Coding
  - Performed QA testing for the point-earning waste sorting and recycling flow
  - **Duration:** November 2025 (1 month)

- **Rajamangala University of Technology Lanna**

- **Human Detection System with Edge Computing (University Project)**

  AI-powered IoT Monitoring System

  - Developed an AI-based human detection system using ESP32 and Machine Learning on Edge Computing
  - Implemented real-time monitoring dashboard with automated alert notifications
  - Validated detection accuracy and system performance through continuous testing
  - Performed functional testing and system reliability verification before deployment
  - **Duration:** 20 November 2024 - 26 March 2025 (4 months)

SKILLS

Hard Skills

- **Programming & Scripting:** Python, JavaScript, PHP, Ruby (Ruby on Rails), React, HTML, CSS, Machine Learning (basic concepts)
- **Testing Methodology:** Black-box Testing, Functional Testing, Regression Testing, End-to-End (E2E) Testing, User Acceptance Testing (UAT), API Validation, Test Case & Test Scenario Design
- **Tools & Platforms:** Trello, Git, Bruno, Postman, VS Code, AzureDevOps
- **Web Technologies:** Ruby on Rails, HTML, CSS, RESTful APIs
- **Database:** PostgreSQL, MySQL, SQLite
- **Operating Systems:** Windows, Linux

Soft Skills

- Strong analytical thinking and problem-solving skills
- Fast learner with high attention to detail
- Effective communication and teamwork
- Experience collaborating with developers to verify and resolve defects
- Familiar with SDLC process and working in Agile
- Thai (Native) | English (Intermediate)

KEY RESPONSIBILITIES

- Designed and executed comprehensive test cases across multiple modules
- Performed API validation and dashboard data verification
- Validated business logic, workflows, and approval processes
- Tracked and managed defects until resolution
- Participated in Agile sprint testing and release validation
